IBRO Publications Committee

Chairman, A. D. SMITH; M. ITO, E. R. KANDEL, P. G. KOSTYUK, K. KRNJEVIĆ, R. LLINÁS, D. RICHTER.

Aims and Scope:

Neuroscience publishes papers describing the results of original research on any aspect of the scientific study of the nervous system. Since one of the chief aims of the journal is to promote communication between neuroscientists, the type of paper most suitable for publication is that in which new observations are clearly and succinctly reported and in which the purpose of the study is made meaningful to scientists of other disciplines. Any paper, however short, will be considered for publication provided that it reports significant, new and carefully confirmed findings with full experimental details. For *Instructions to Authors* see Vol. 20, No. 1, pp. iii–vi.

Production Controller: R. L. WATSON. *Editorial Assistant:* S. J. RUSSELL.

Publishing, Subscription and Advertising Offices: Headington Hill Hall, Oxford OX3 0BW (Oxford 64881).
Published monthly (three volumes per annum).
Annual institutional rate (1987) *DM* 2700.
Two-year institutional rate (1987/88) *DM* 5130.
Personal subscription rate for those whose library subscribes at the regular rate (1987) *DM* 271.
Prices are subject to change without notice.
Members of the International Brain Research Organization may order personal subscriptions at a concessional rate and details of these rates are available on request. Airmail Subscription extra. Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

LIST OF CONTENTS

VOLUME 20 NUMBER 1 JANUARY 1987

C. Sotelo and **R. M. Alvarado-Mallart**	Reconstruction of the defective cerebellar circuitry in adult Purkinje cell degeneration mutant mice by Purkinje cell replacement through transplantation of solid embryonic implants	1
G. Raivich and **G. W. Kreutzberg**	The localization and distribution of high affinity β-nerve growth factor binding sites in the central nervous system of the adult rat. A light microscopic autoradiographic study using [^{125}I]β-nerve growth factor	23
A. M. Davies, A. G. S. Lumsden and **H. Rohrer**	Neural crest-derived proprioceptive neurons express nerve growth factor receptors but are not supported by nerve growth factor in culture	37
E. C. Azmitia and **P. M. Whitaker-Azmitia**	Target cell stimulation of dissociated serotonergic neurons in culture	47
R. Cortés, A. Probst and **J. M. Palacios**	Quantitative light microscopic autoradiographic localization of cholinergic muscarinic receptors in the human brain: forebrain	65
R. W. Foote	Fiber tracts that contain more opioid binding sites than gray matter does: a quantitative autoradiographic study in the guinea-pig	109
M.-L. Bouthenet, M.-P. Martres, N. Sales and **J.-C. Schwartz**	A detailed mapping of dopamine D-2 receptors in rat central nervous system by autoradiography with [^{125}I]-iodosulpride	117
J. F. Plantjé, H. W. M. Steinbusch, J. Schipper, F. A. Dijcks, P. F. H. M. Verheijden and **J. C. Stoof**	D-2 dopamine-receptors regulate the release of [^{3}H]dopamine in rat cortical regions showing dopamine immunoreactive fibers	157
E. Ekblad, C. Winther, R. Ekman, R. Håkanson and **F. Sundler**	Projections of peptide-containing neurons in rat small intestine	169
A. Surprenant, R. A. North and **Y. Katayama**	Observations on the actions of substance P and [D-Arg^{1}, D-Pro^{2}, D-Trp^{7,9}, Leu^{11}]substance P on single neurons of the guinea pig submucous plexus	189
H. E. Raybould and **R. Dimaline**	Antibodies to fragments of provasoactive intestinal peptide reveal subpopulations of vasoactive intestinal peptide containing neurons in the rat gut	201
R. J. Weinberg and **A. Rustioni**	A cuneocochlear pathway in the rat	209
T. Sakaguchi and **S. Nakamura**	The mode of projections of single locus coeruleus neurons to the cerebral cortex in rats	221
I. McFadzean, M. G. Lacey, R. G. Hill and **G. Henderson**	Kappa opioid receptor activation depresses excitatory synaptic input to rat locus coeruleus neurons *in vitro*	231
C. D. Tweedle and **G. I. Hatton**	Morphological adaptability at neurosecretory axonal endings on the neurovascular contact zone of the rat neurohypophysis	241
E. D. Schmidt and **E. W. Roubos**	Morphological basis for nonsynaptic communication within the central nervous system by exocytotic release of secretory material from the egg-laying stimulating neuroendocrine caudodorsal cells of *Lymnaea stagnalis*	247

K. Mori, K. Imamura, S. C. Fujita and K. Obata	Projections of two subclasses of vomeronasal nerve fibers to the accessory olfactory bulb in the rabbit	259
M. L. Errington, M. A. Lynch and T. V. P. Bliss	Long-term potentiation in the dentate gyrus: induction and increased glutamate release are blocked by D(–)aminophosphonovalerate	279
L. Turski, T. Klockgether, M. Schwarz, K.-H. Sontag and B. S. Meldrum	Unusual interactions of excitatory amino acid receptor agonists: α- and β-kainate antagonize motor responses to N-methyl-D-aspartate in rodents	285
P. Calabresi, U. Misgeld and H. U. Dodt	Intrinsic membrane properties of neostriatal neurons can account for their low level of spontaneous activity	293
J. M. Wild	Thalamic projections to the paleostriatum and neostriatum in the pigeon (*Columba livia*)	305
L. Churchill, T. L. Pazdernik, R. S. Cross, M. P. Giesler, S. R. Nelson and F. E. Samson	Cholinergic systems influence local cerebral glucose use in specific anatomical areas: diisopropyl phosphorofluoridate versus soman	329
W. Walz and E. C. Hinks	Extracellular hydrogen ions influence channel-mediated and carrier-mediated K^+ fluxes in cultured mouse astrocytes	341
R. M. Buijs, E. H. S. van Vulpen and M. Geffard	Ultrastructural localization of GABA in the supraoptic nucleus and neural lobe	347
SOFTWARE SURVEY SECTION		I

VOLUME 20 NUMBER 2 FEBRUARY 1987

H. A. Coleman	Multiple sites for the initiation of action potentials in neurons of the inferior mesenteric ganglion of the guinea-pig	357
N. G. Bowery, A. L. Hudson and G. W. Price	$GABA_A$ and $GABA_B$ receptor site distribution in the rat central nervous system	365
R. Schlichter, M. Desarmenien, G. Li Volsi, E. Desaulles and P. Feltz	Low concentrations of GABA reduce accommodation in primary afferent neurons by an action at $GABA_B$ receptors	385
R. L. M. Faull and J. W. Villiger	Opiate receptors in the human spinal cord: a detailed anatomical study comparing the autoradiographic localization of [^{3}H]diprenorphine binding sites with the laminar pattern of substance P, myelin and Nissl staining	395
A. J. Beitz, J. R. Clements L. J. Ecklund and M. M. Mullett	The nuclei of origin of brainstem enkephalin and cholecystokinin projections to the spinal trigeminal nucleus of the rat	409
J. R. Clements and A. J. Beitz	A quantitative light microscopic analysis and ultrastructural description of cholecystokinin-like immunoreactivity in the spinal trigeminal nucleus of the rat	427
G. Ju, T. Melander, S. Ceccatelli, T. Hökfelt and P. Frey	Immunohistochemical evidence for a spinothalamic pathway co-containing cholecystokinin- and galanin-like immunoreactivities in the rat	439
C. Routledge and C. A. Marsden	Electrical stimulation of the C_1 region of the rostral ventrolateral medulla of the rat increases mean arterial pressure and adrenaline release in the posterior hypothalamus	457

J. B. Cabot and **N. Bogan**	Light microscopic observations on the morphology of sympathetic preganglionic neurons in the pigeon, *Columba livia*	467
E. Senba, P. E. Daddona and **J. I. Nagy**	A subpopulation of preganglionic parasympathetic neurons in the rat contain adenosine deaminase	487
Z. Henderson	Cholinergic innervation of ferret visual system	503
J. E. Morgan, Z. Henderson and **I. D. Thompson**	Retinal decussation patterns in pigmented and albino ferrets	519
R. D. Mooney, B. G. Klein and **R. W. Rhoades**	Effects of altered visual input upon the development of the visual and somatosensory representations in the hamster's superior colliculus	537
R. M. Beckstead	Striatal substance P cell clusters coincide with the high density terminal zones of the discontinuous nigrostriatal dopaminergic projection system in the cat: a study by combined immunohistochemistry and autoradiographic axon-tracing	557
P. N. Izzo, A. M. Graybiel and **J. P. Bolam**	Characterization of substance P- and [Met]enkephalin-immunoreactive neurons in the caudate nucleus of cat and ferret by a single section Golgi procedure	577
G. H. Fletcher and **M. S. Starr**	Topography of dopamine behaviours mediated by D_1 and D_2 receptors revealed by intrastriatal injection of SKF 38393, lisuride and apomorphine in rats with a unilateral 6-hydroxydopamine-induced lesion	589
M. J. Freund-Mercier, M. E. Stoeckel, J. M. Palacios, A. Pazos, J. M. Reichhart, A. Porte and **Ph. Richard**	Pharmacological characteristics and anatomical distribution of [^{3}H]oxytocin-binding sites in the Wistar rat brain studied by autoradiography	599
S. Y. Chai, F. A. O. Mendelsohn and **G. Paxinos**	Angiotensin converting enzyme in rat brain visualized by quantitative *in vitro* autoradiography	615
P. B. Reiner, K. Semba, H. C. Fibiger and **E. G. McGeer**	Physiological evidence for subpopulations of cortically projecting basal forebrain neurons in the anesthetized rat	629
K. Semba, P. B. Reiner, E. G. McGeer and **H. C. Fibiger**	Morphology of cortically projecting basal forebrain neurons in the rat as revealed by intracellular iontophoresis of horseradish peroxidase	637
S. B. Dunnett, I. Q. Whishaw, G. H. Jones and **S. T. Bunch**	Behavioural, biochemical and histochemical effects of different neurotoxic amino acids injected into nucleus basalis magnocellularis of rats	653
C. Ikonomidou-Turski, E. A. Cavalheiro, W. A. Turski, Z. A. Bortolotto and **L. Turski**	Convulsant action of morphine, [D-Ala^2, D-Leu^5]-enkephalin and naloxone in the rat amygdala: electroencephalographic, morphological and behavioural sequelae	671
S. Patel and **P. Slater**	Analysis of the brain regions involved in myoclonus produced by intracerebral picrotoxin	687
H. M. Sinnamon, R. N. Ginzburg and **G. A. Kurose**	Midbrain stimulation in the anesthetized rat: direct locomotor effects and modulation of locomotion produced by hypothalamic stimulation	695
N. Halász	Early X-irradiation of rats—II. Effect on granule cells and their dendrodendritic synapses in the olfactory bulb	709
Erratum		717
